

Biotage Cookie Policy

What Is a Cookie?

A cookie is a small file or data string, which is stored on your device by a website.

What Data Do Cookies Contain?

Usually, cookies carry identification on the source, a timestamp for expiry, and a scrambled settings value.

What are Cookies Used For?

Cookies work like your browser's memory – they enable your device to remember settings in between sessions, such as items stored in the cart, language settings and currency preferences. In short: they ensure you don't have to select the same preferences over again every time you visit a website.

Are Cookies Programs?

No. Cookies are non-executable, meaning they cannot run or alter anything on your device.

Does Biotage Use Cookies?

Yes. We use cookies for user authentication, to control the level of access to information on our websites, to pre-fill forms, and gather web traffic statistics.

Third Party Cookies

Embedded content from other websites such as videos and "share"-buttons may present cookies from other websites. Check the relevant third party's cookie policy for more information about these cookies.

Can We Identify You Via Cookies?

No. Cookies do not carry personal information.

For How Long are Biotage Cookies Stored on My Device?

Some cookies (session cookies) last throughout the session, meaning they expire when you leave the website.

Persistent cookies are stored in your browser's cookie folder until they are deleted. They enable us to recognize you when you return, and remember your settings on our websites.

Can I Prevent Cookies from Being Stored?

Yes. Your email client and browser settings will allow you to block cookies for all or individual senders or websites. Some browsers also contain a "private" browsing mode.

Can I Delete Cookies?

Yes. Your browser will let you clear cookies as well as other temporary website files and browsing history.

More Information

There is plenty to read about cookies online. A good place to start is <http://www.allaboutcookies.org/>
